

## TABLE DES MATIÈRES

B. CADOREL, E. ROUSSEAU & B. TAJI. — Hyperbolicity of singular spaces	1-18
R. COULON & D. OSIN. — A non-residually finite group acting uniformly properly on a hyperbolic space	19-30
D. CALAQUE & J. GRIVAUX. — The Ext algebra of a quantized cycle	31-77
R. ABDELLATIF & A. HÉBERT. — Completed Iwahori-Hecke algebras and parahoric Hecke algebras for Kac-Moody groups over local fields	79-118
M. R.R. ALVES, V. COLIN & K. HONDA. — Topological entropy for Reeb vector fields in dimension three via open book decompositions	119-148
A. FISH. — Extensions of Schreiber’s theorem on discrete approximate subgroups in $\mathbb{R}^d$	149-162
O. BIQUARD & T. DELCROIX. — Ricci flat Kähler metrics on rank two complex symmetric spaces	163-201
P. BOYER. — Principe de Mazur en dimension supérieure	203-230
P.-E. CHAPUT & J. MAUBON. — Maximal representations of cocompact complex hyperbolic lattices, a uniform approach	231-281
M. MUSTĂŢĂ & M. POPA. — Hodge ideals for $\mathbf{Q}$ -divisors : birational approach	283-328
N. ARRIZABALAGA, L. LE TREUST, A. MAS & N. RAYMOND. — The MIT Bag Model as an infinite mass limit	329-365
L. FUNAR. — On the topology of closed manifolds with quasi-constant sectional curvature	367-423
F. DAHMANI & M. MJ. — Corrigendum to “Height graded relative hyperbolicity and quasiconvexity”	425-432
D. BRESCH, S. NEČASOVÁ & C. PERRIN. — Compression effects in heterogeneous media	433-467
